## Second Bite - The Wisdom of the Apple

**A look at the technology behind the art**

Omsoft, 1930 5th Street (behind Suite C), Davis

7pm on 17<sup>th</sup> February 2020

Second Bite is an amalgam of technology, art and a celebration of women. Currently situated at Omsoft in Davis, Adele Louise Shaw's art installation uses a hundred Apple computers to portray a vision of wonder from many ages and cultures.

We have an opportunity to take a peek behind the scenes of the technology as well as the art.

Larry Dieterich will provide a demonstration and discussion. The event is free and there will be refreshments. More detail may be found at <https://secondbite.net/>.
