

# Liferay Portal

---

Enterprise. Open Source. For Life.

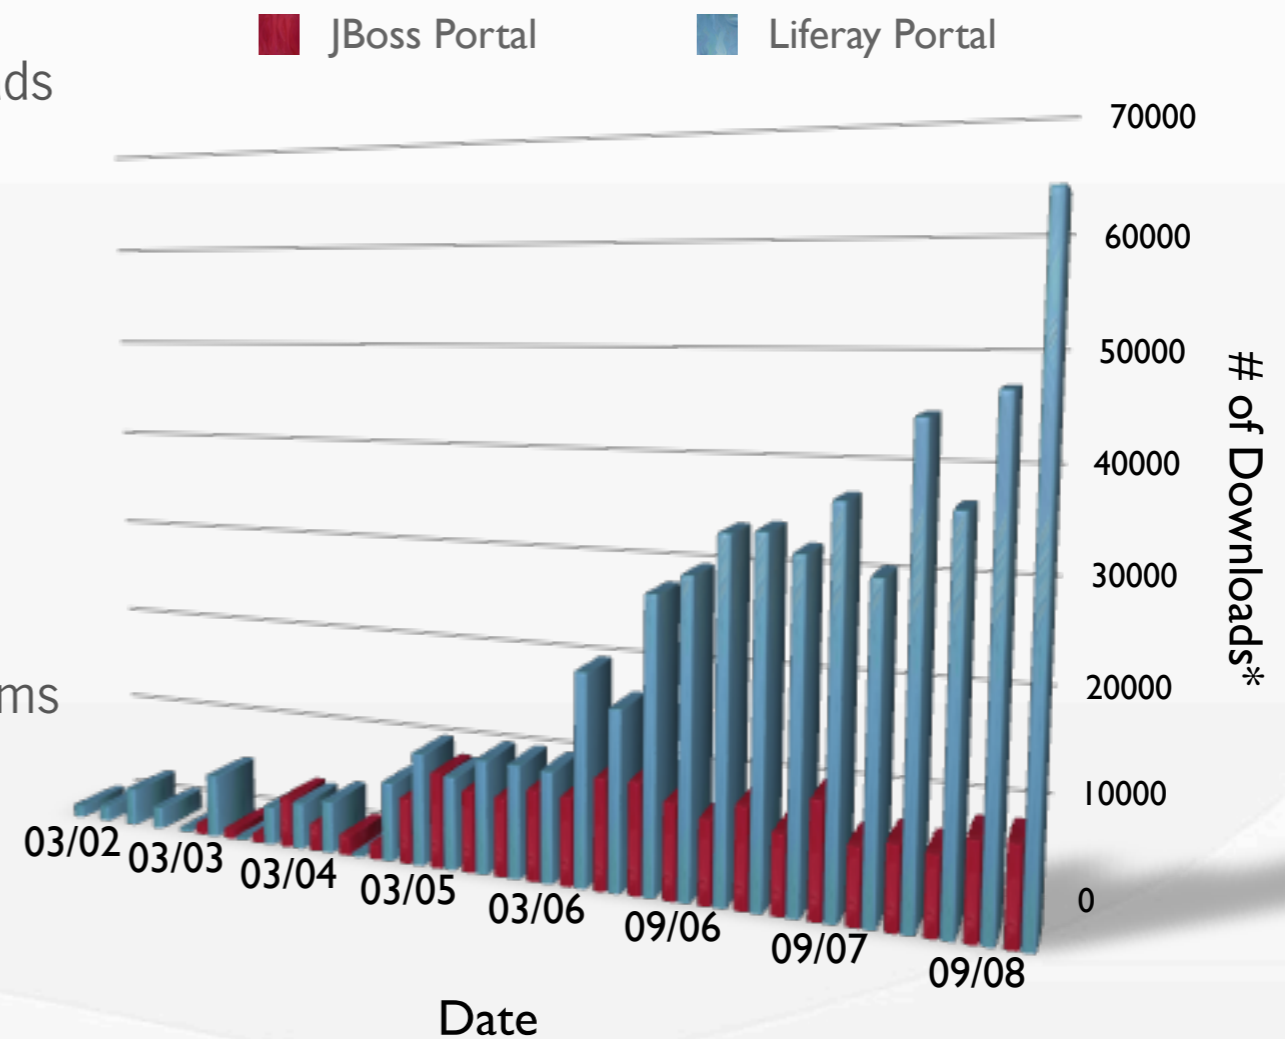

# The Open Source Leader:

## Introducing Liferay Portal

In its 10th year of development, Liferay Portal is today's most popular and widely downloaded open source portal.

- Over 2.5 Million downloads and 80,000 downloads per month
  - ~66% of downloads – Liferay Portal
  - ~33% of downloads – Liferay IDE & Plug-ins
- Over 19,000 registered users on Liferay.com
- Over 50 active volunteer contributors
- Another 30-35 contributors from Sun Microsystems

\*statistics taken from SourceForge.net

A full-bodied feature list and extensibility appeals to managers and developers alike, making Liferay a leader in the portal space.

Open alternative to:

- IBM Websphere Portal
- Oracle/BEA Portal
- Sharepoint for document workspaces
- Jive Clearspace for collaboration

## Established in portal market... and emerging in social software

### MQ Horizontal Portals, 2008

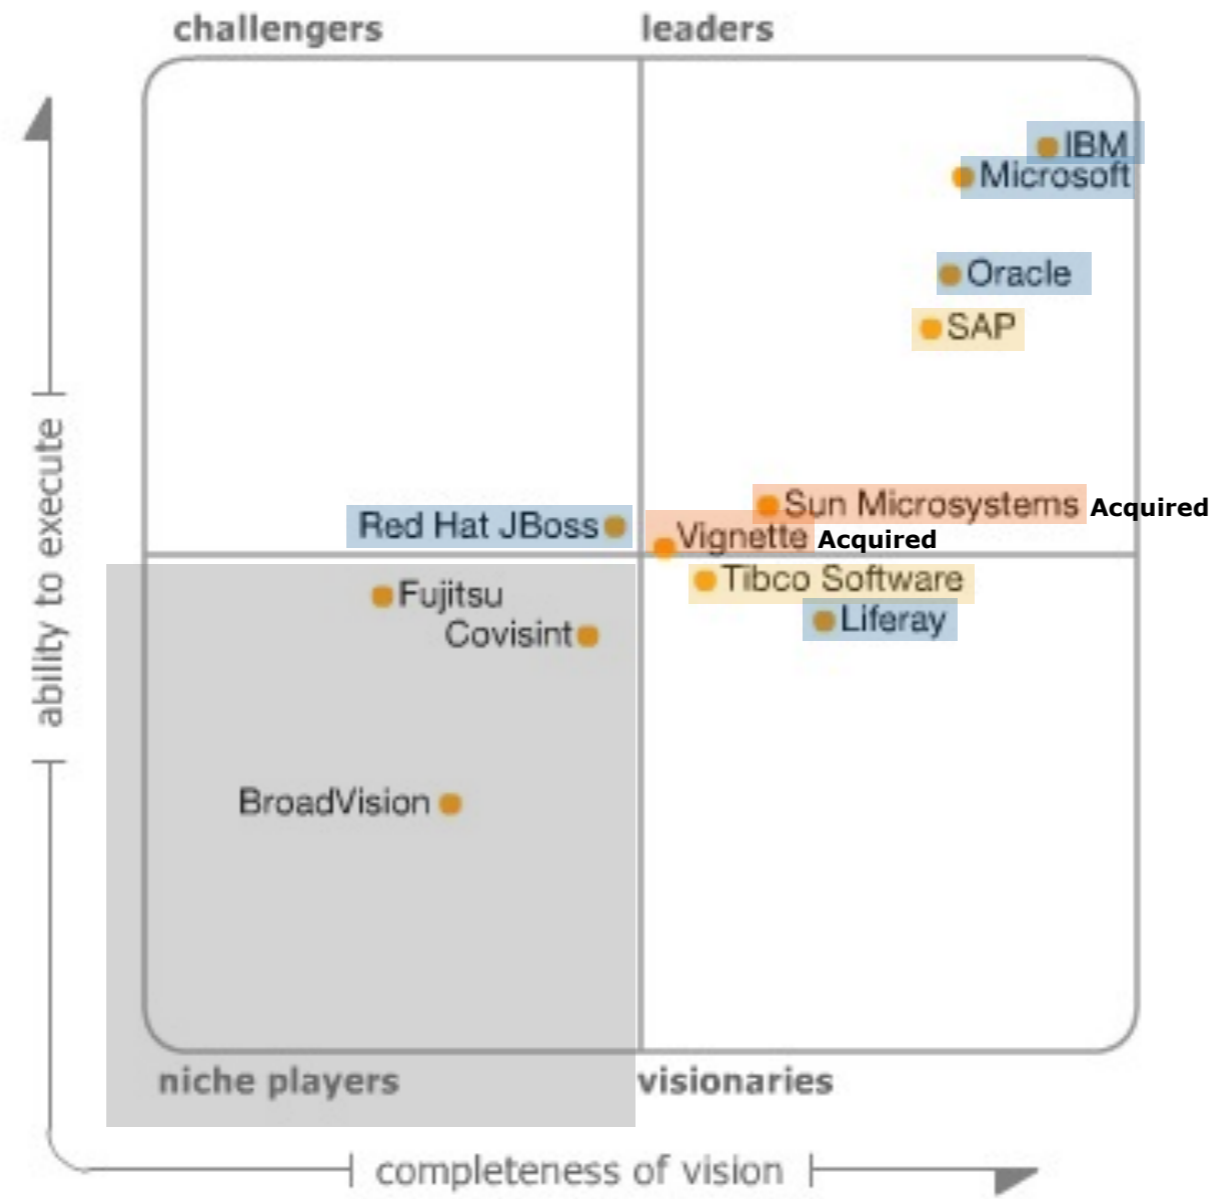

- Positioned as **Visionary**, demonstrating completeness of vision, innovation leadership, market understanding, and overall strategy
- One of only two **open source portal vendors**, and among few pure-play portal vendors
- “Liferay is rapidly gaining **market traction and visibility** out of proportion to the company's small size.”
- Leads in **feature completeness and ROI** among twelve vendors represented

<http://mediaproducts.gartner.com/reprints/microsoft/vol6/article2/article2.html>

### MQ Social Software, 2008

- Relatively **well-positioned** in a crowded market with no established leaders
- Only **comprehensive solution to enable enterprise 2.0: social computing + enterprise integration**
- “Combines team-oriented information sharing capabilities with informal content creation and organization through content management (including integration with Microsoft Office...), blogs, wikis, discussions, activity tracking and tagging.”

<http://mediaproducts.gartner.com/reprints/microsoft/vol6/article5/article5.html>

As of September 2008

### Travel

- Lufthansa Flight Training
- Leading European Airline
- Kempinski Hotels

**Liferay Portal 5.2:**

## **Building on a Tradition of Value**

## Liferay has always been positioned for value:

- Pervasive compatibility—Liferay runs on all major app servers, databases and operating systems. Minimizes new spending on infrastructure.

- Can run PHP, Ruby, Python, and more—protect HR training and skills investments.
- Pre-integrated with leading open source offerings.
- Liberal MIT license is very flexible toward business use.

## Built-in Web Content Management and Document Management

Liferay WCM is used by leading enterprises like Benetton, Cisco, and Sesame Workshop.

- Full web publishing solution with localization, publishing workflow, scheduled staging and structured content
- Document library with multiple file uploads and versioning
- Office integration using Sharepoint protocols and WebDAV support
- Social / Web 2.0 features: tagging, RSS, ratings and comments
- Dynamic search built-in with Search Engine Optimization (SEO)
- Multi-tenancy for hosting or ASP solutions

## Built-in Collaboration Suite

Liferay Collaboration brings the best collaboration tools together in a single package with all the benefits of Liferay's group workspaces, including roles, permissions, page management, and social computing features.

- Message Boards, Blogs, Wikis
- WebMail
- Shared Calendars
- Enterprise Chat
- RSS Feeds
- Tagging, Ratings, Comments

## Built-in Social Computing and Mashups

Liferay includes tools to help enterprises create functional social networks and easily deploy widgets and mashups to meet business needs.

- Build a **social network** for your enterprise with a single plugin.
- Find **knowledge and expertise** in your organization with profiles.
- Familiar social features: Friend List, Facebook-style Wall, and Activity Tracker.
- The **Activity Tracker API** makes it easy to integrate third party portlets and applications.
- Integrated **instant messaging** and presence for compliance persists across all pages.
- Publish Liferay portlets to **Facebook, Myspace, iGoogle** or any website.

**Liferay Portal Benefits:**

**Immediate Value and Long-Term Competitive Advantage**

## Significant Savings

Customers that deployed Liferay Portal to production systems can **save an average of 93%** in the first year over retail pricing for solutions from IBM<sup>®</sup> and Oracle<sup>®</sup>.

Liferay	Oracle WebCenter Suite					
Per Year	First Year License	Yearly Maint	2 Year Total	3 Year Total	4 Year Total	5 Year Total
Unit Price	125,000	27,500				
Total Price	1,000,000	220,000	1,220,000	1,440,000	1,660,000	1,880,000
Liferay Price			79,980	119,970	159,960	199,950
Savings			1,140,020	1,320,030	1,500,040	1,680,050
	96.0%	81.8%	93.4%	91.7%	90.4%	89.4%

Liferay	IBM Websphere Portal (no accelerators)					
Per Year	First Year License	Yearly Maint	2 Year Total	3 Year Total	4 Year Total	5 Year Total
Unit Price	55,000	11,000				
Total Price	440,000	88,000	528,000	616,000	704,000	792,000
Liferay Price			79,980	119,970	159,960	199,950
Savings			448,020	496,030	544,040	592,050
	90.9%	54.6%	84.9%	80.5%	77.3%	74.8%

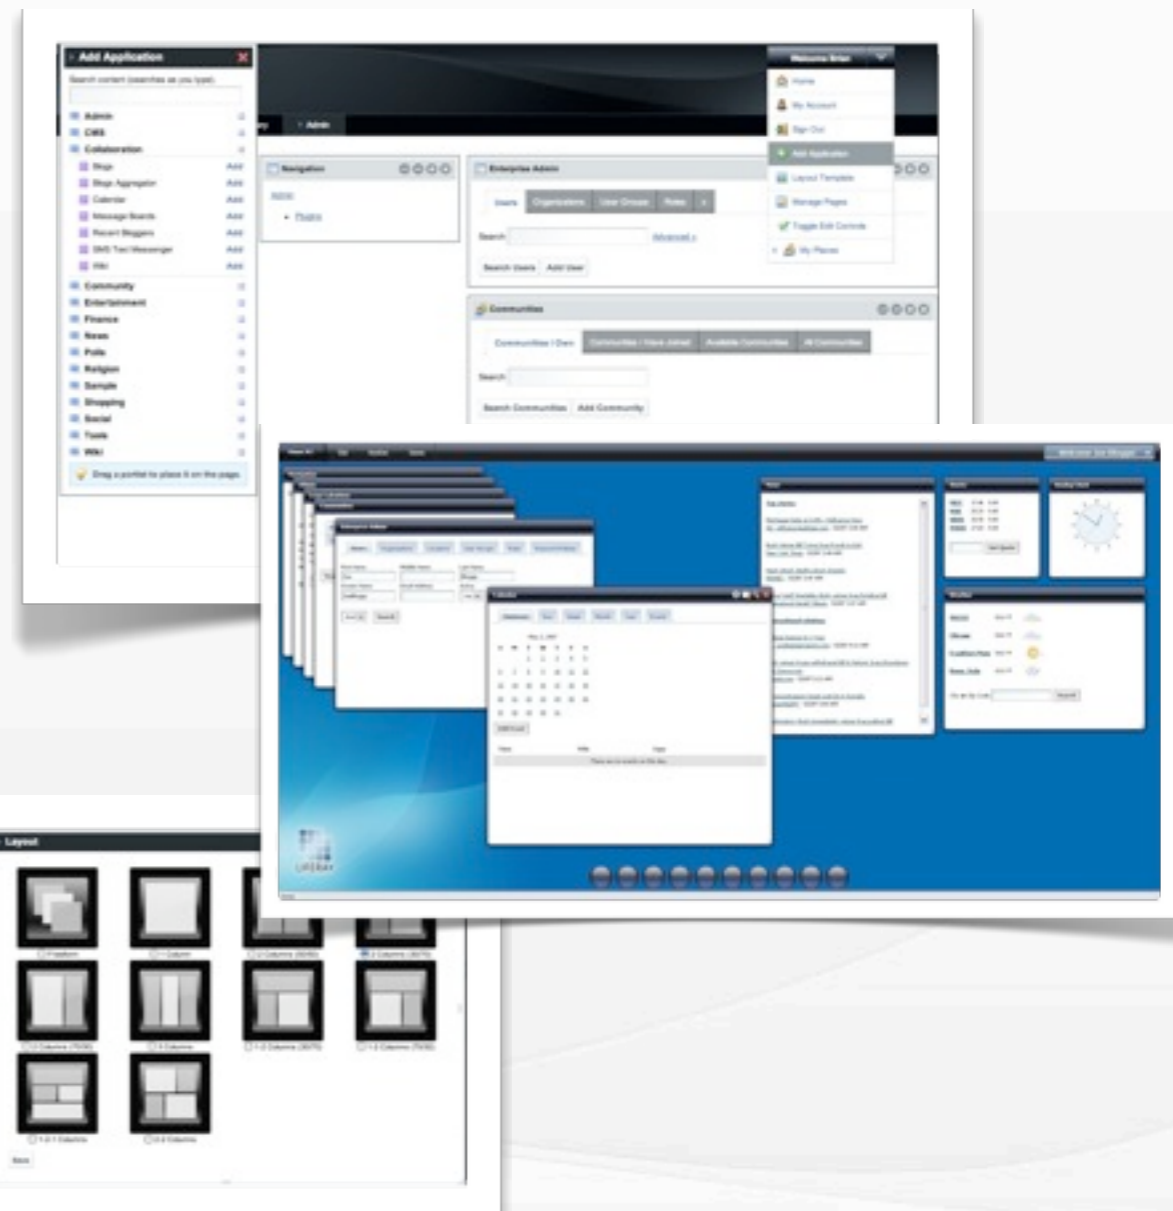

Pricing based on 2 servers, 8 CPU (4 CPU per server).

IBM yearly maintenance assumed to be 20%. Oracle yearly maintenance from price list. Liferay subscription uses platinum pricing.

## Intuitive User Experience

End-users enjoying working in Liferay Portal, leading to higher ROI.

- Tasteful use of AJAX and CSS provides an **enhanced user experience**
- Users can **customize** their portal experience with control over layout, look and feel, and styling
- A **community-centric** approach makes it easy to create extranets, intranets, social sites or team collaboration spaces
- **Familiar conventions** from the desktop and the web reduce the learning curve
- Granular security and role based authorizations help administrators customize the user experience
- Options to use Flex, Laszlo, ICEfaces, JSF or mobile-targeted presentation frameworks make it possible to create a rich internet experience

## Plugins

Plugins are separate hot deployable WARs that can live within a designated repository and be installed via the [Plugin Installer](#) or updated via the [Update Manager](#).

- **Portlet Plugins**

- **Theme Plugins**

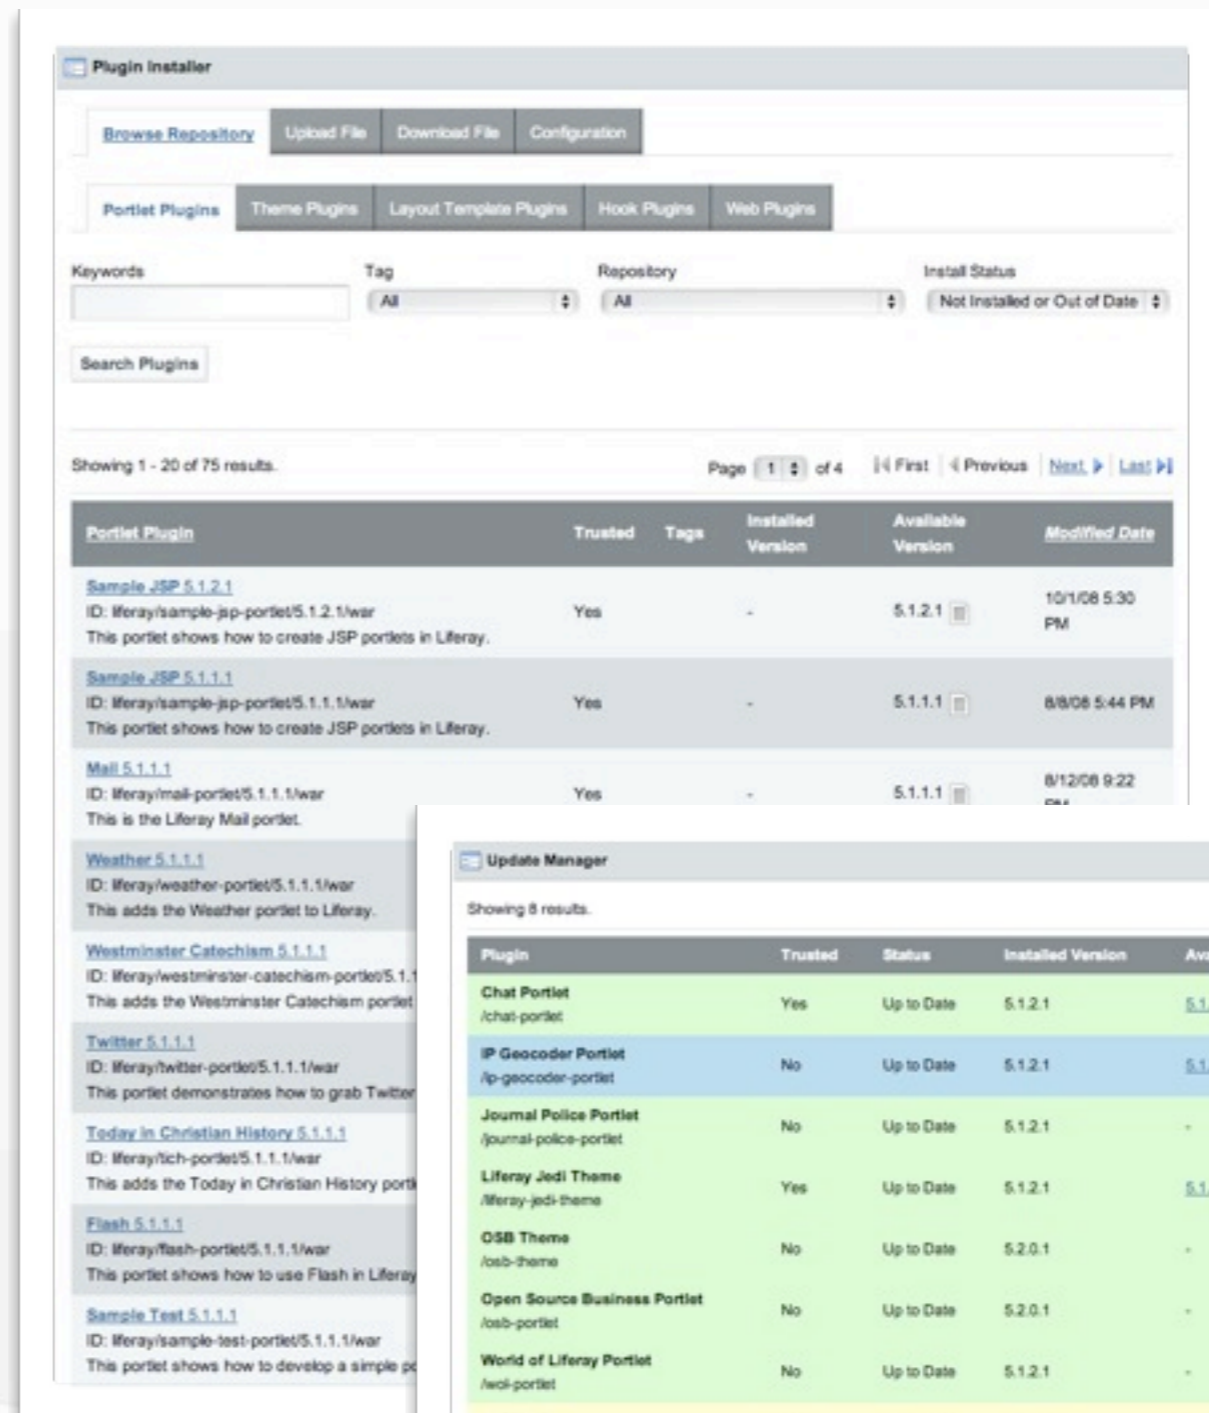

- **Hook Plugins**

Hook Plugins allow you to hook into the eventing system, model listeners, JSPs, and portal properties.

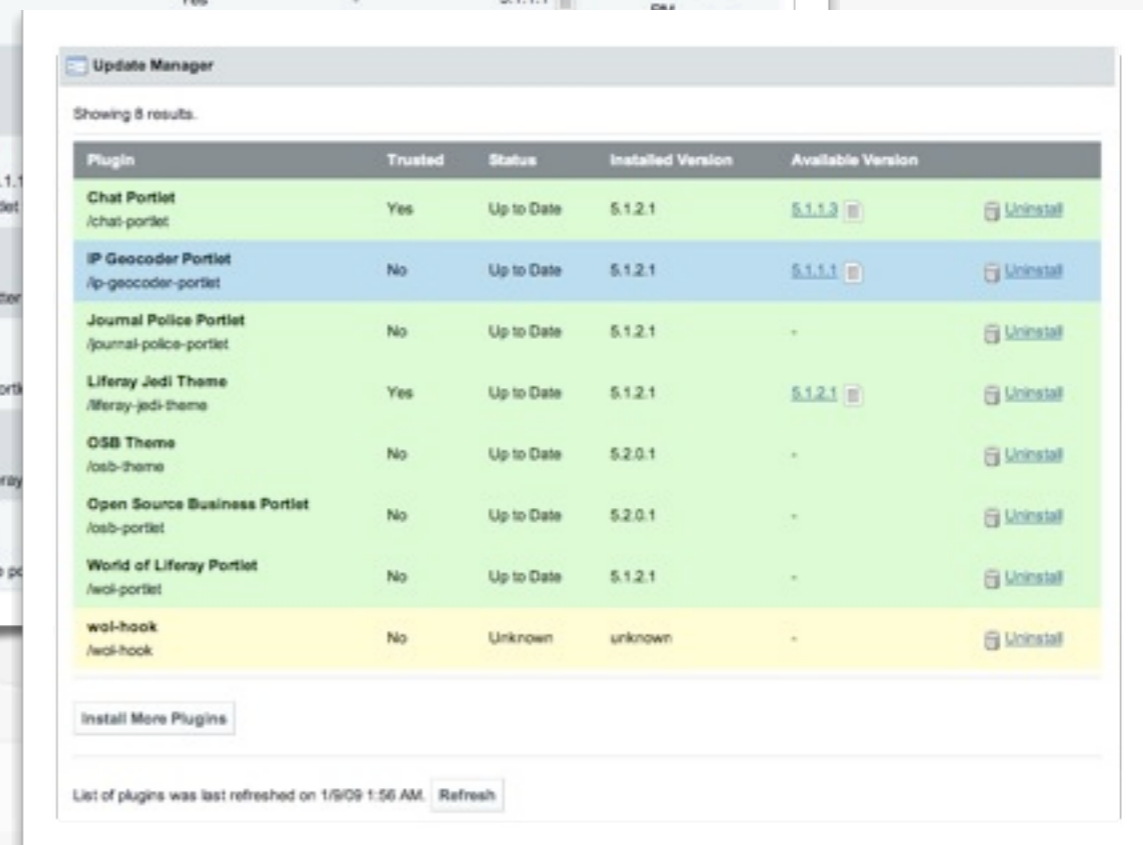

- **Layout Template Plugins**

- **Web Plugins**

Web Plugins are regular Java EE web modules that are designed to work with Liferay (i.e. integration with various ESB implementations)

The screenshot shows the 'Plugin Installer' interface. It includes navigation tabs for 'Browse Repository', 'Upload File', 'Downloaded File', and 'Configuration'. Below these are tabs for 'Portlet Plugins', 'Theme Plugins', 'Layout Template Plugins', 'Hook Plugins', and 'Web Plugins'. There are search filters for 'Keywords', 'Tag', 'Repository', and 'Install Status'. A search button is present. The main area displays a table of plugins with columns for 'Portlet Plugin', 'Trusted', 'Tags', 'Installed Version', 'Available Version', and 'Modified Date'. The table lists several plugins including 'Sample JSP 5.1.2.1', 'Sample JSP 5.1.1.1', 'Mail 5.1.1.1', 'Weather 5.1.1.1', 'Westminster Catechism 5.1.1.1', 'Twitter 5.1.1.1', 'Today in Christian History 5.1.1.1', 'Flash 5.1.1.1', and 'Sample Test 5.1.1.1'.

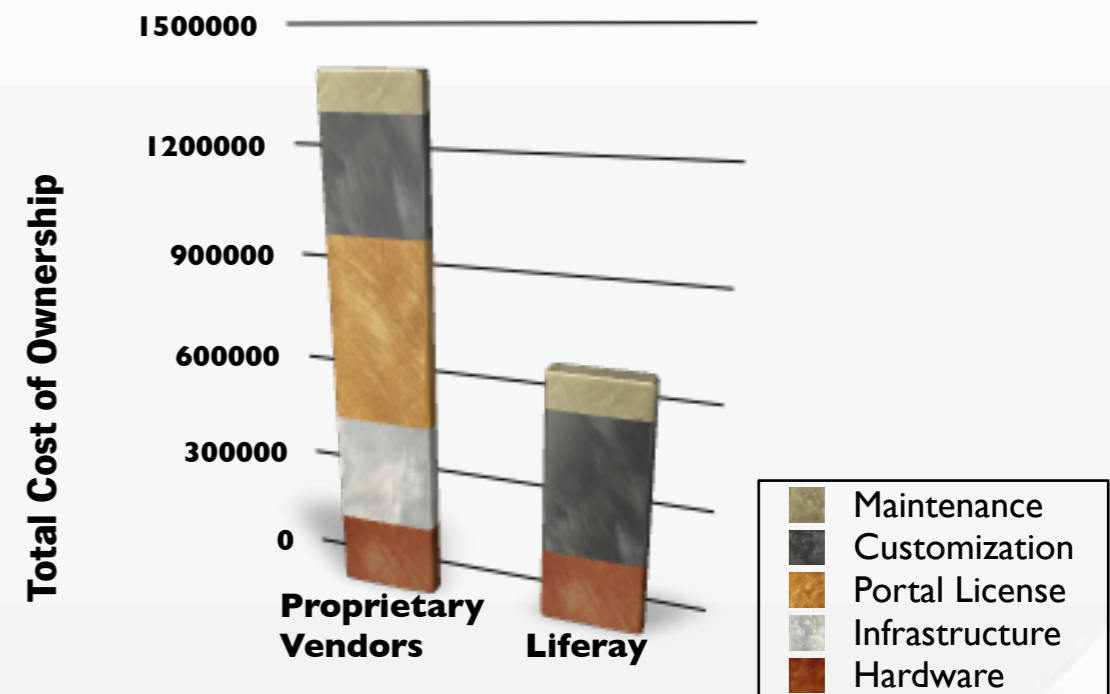

The screenshot shows the 'Update Manager' interface. It displays a table with columns for 'Plugin', 'Trusted', 'Status', 'Installed Version', and 'Available Version'. The table lists several plugins including 'Chat Portlet', 'IP Geocoder Portlet', 'Journal Police Portlet', 'Liferay Jedi Theme', 'OSB Theme', 'Open Source Business Portlet', 'World of Liferay Portlet', and 'wol-hook'. Each row includes an 'Uninstall' button. The interface also shows a 'Refresh' button and a timestamp indicating when the list was last refreshed.

## Lowest Total Cost of Ownership and Immediate ROI

Liferay Portal is designed to deploy painlessly and provide immediate value while also making customization and integration easy.

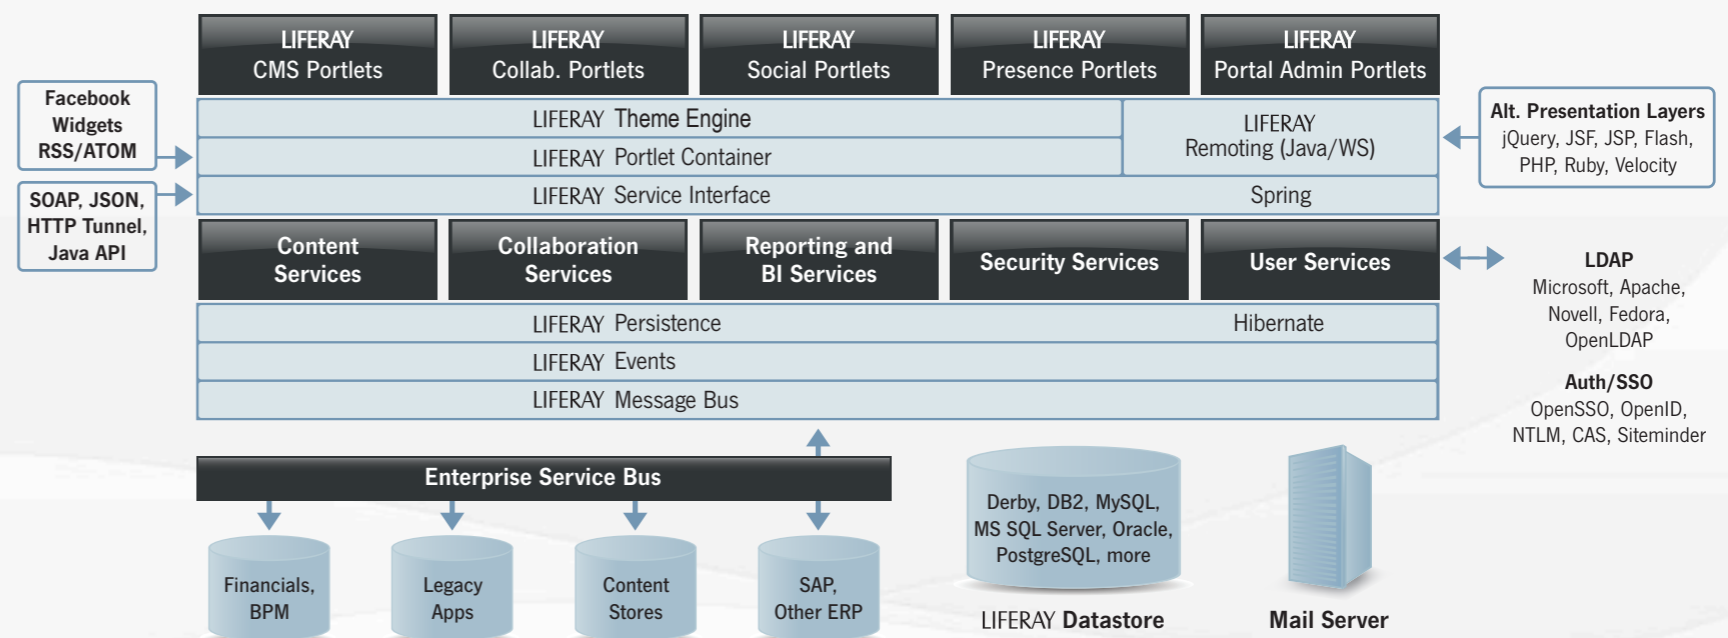

- Minimal or no capital expenditures
- Runs on **existing infrastructure** to minimize costs
- Equal or lower operational expenses
  - Contributions maintained by Liferay
  - Bug fixes and innovation from community
- **Risk-free** and business-friendly open source license

## Developer Friendly Technology:

Liferay Portal makes integration easy on the front and back end.

- Service Oriented Architecture (SOA) with built-in support for web services (including SOAP, JSON and HTTP)
- Compliance to open standards: JSR-286, JSR-170, JBI, WSRP 1/2, JSR-88, .ics / .ical
- Built-in support for SSO and LDAP, with customizable authentication
- Innovative compatibility with major scripting languages (PHP, Ruby, and Python)
- Use Liferay as a mashup server with iGoogle, Facebook integration and widget capability
- Secure enterprise application integration framework
- Ready integration with other leading open source technologies (Intalio, Pentaho, Jasper)

## Long-term Innovation, Evolution, Scalability

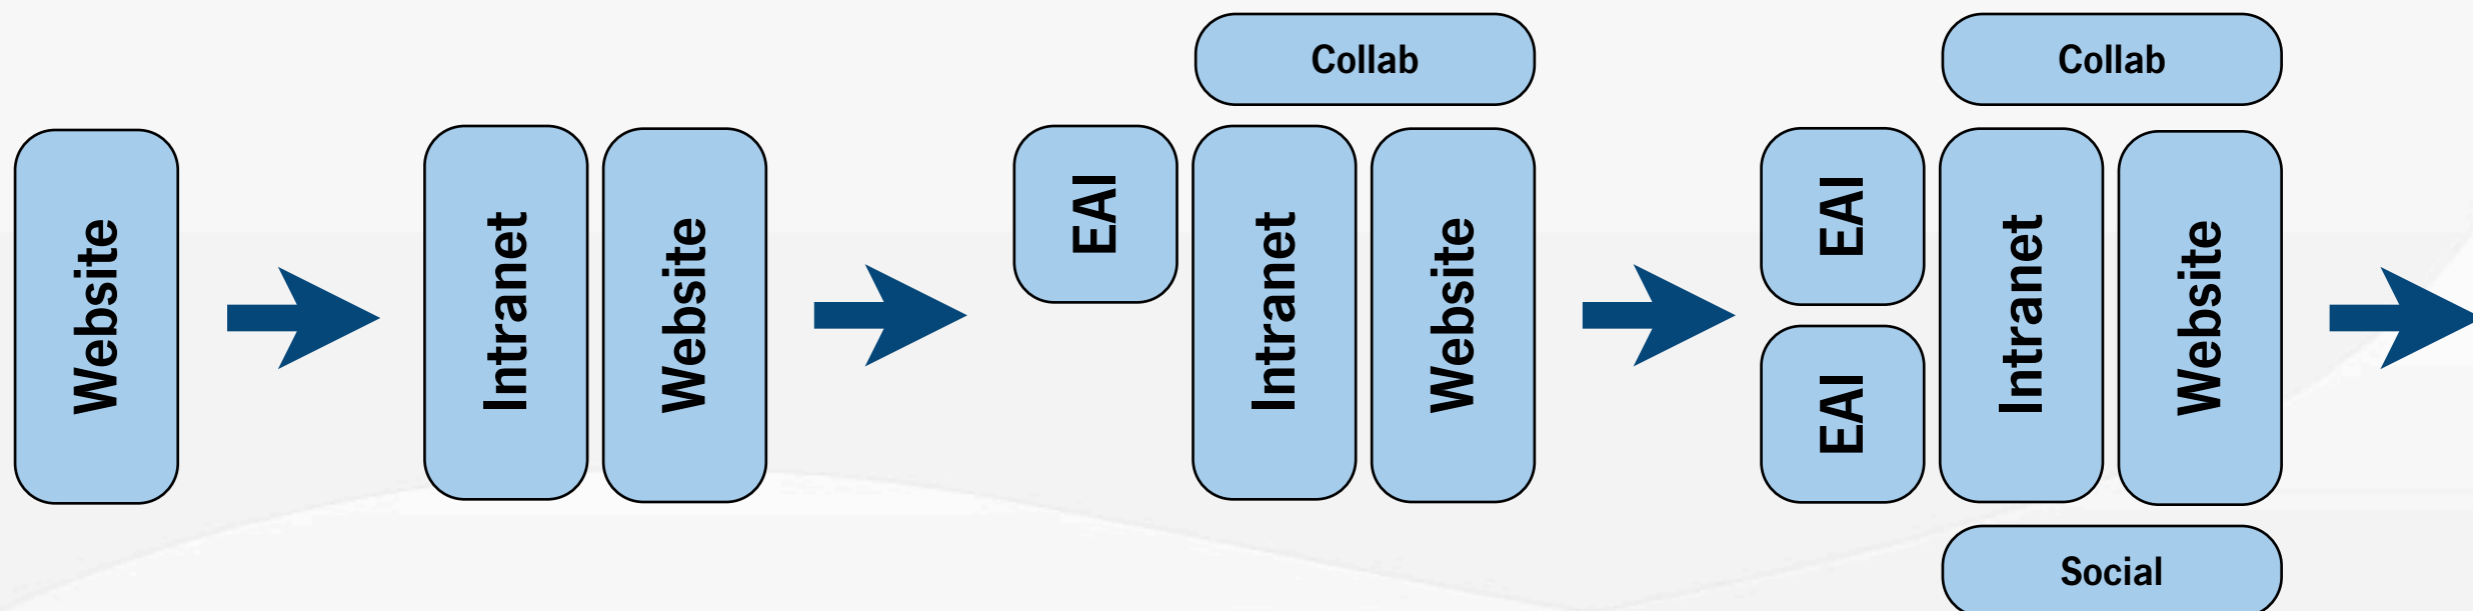

- Phased agile approach to portal development
- Terracotta integration for **low-cost scalability**
- Customizable to fit **long-term business strategy**
- **Commercial support** provides stability for enterprises

## Industry Attention

- Named a “Visionary” in Gartner’s Magic Quadrant for Portal Products
- InfoWorld’s Best of Open Source Software (2007, 2008)

*“There are a number of well-known open source portal solutions, including JBoss, Metadot, and MindTouch Deki. But when looking for enterprise strength, Liferay Portal stands apart.”*  
**InfoWorld 2008**

- EContent 100 (2006, 2007, 2008)
- CIO 100 Award (Goodwill Industries)

*“Liferay Portal was by far the most cost effective and efficient portal technology we considered.”*  
– Steve Bergman, CIO  
**Goodwill Industries International**

**Appendix:**

## **Additional Slides on Features**

## Liferay Portal - Features

- Granular security and role-based authorization

Unlike other portals that maintain a simplified role-based permissions scheme, Liferay allows for **granular**, role-based authorizations. Portal administrators can assign individual users or groups of users different "roles" that grant varying levels of access and editing rights to specific communities, files, applications and tools.

- Built-in content tagging

Most pieces of content within the portal are treated as "assets" and can be tagged to help better group them together. This includes blog entries, message board threads, and even web content. Admins can then optionally manage the tags within the portal using the Tags Admin Portlet, or even publish specific types of assets based on the tags that they do or do not have using the Asset Publisher Portlet.

- RSS and email subscriptions

In many cases, Liferay allows users to either subscribe to RSS feeds or via email. This includes things as specific as message board threads, user blogs, user activities, etc.

## Liferay Portal - Features

- Application Scripts

Unlike other portlets that require development and deployment, Application Scripts enable users to create applications on-the-fly.

- Dynamic Datasets

By leveraging a framework called Expandos, Liferay provides a service that allows the creation of dynamic datasets without any change to the database schema. This data can be:

- typed (boolean, Date, double, int, long, short, String, and arrays of all those)
- associated with a specific entity (e.g. 'com.liferay.portal.model.User')
- arranged into any number of "columns"
- available to plugins
- accessed from Velocity templates
- accessed via Liferay's JSON API through AJAX

## Liferay Portal - Features

- Multi-tenancy

Liferay provides the ability to host multiple sites on one deployment of Liferay Portal. In fact, adding another site is as simple as a few mouse-clicks and does **not** require additional deployments or the assistance of a System Administrator. Each community or organization can have its own:

- Virtual host
- Set of users
- Content
- Pages
- Look-and-feel
- Roles
